Career Objective

Highly skilled and dynamic software engineer with 2 years of professional experience in ASP.NET, .NET Core, MVC, Entity Framework, and front-end technologies like Kendo UI and jQuery. Passionate about delivering innovative, efficient, and scalable solutions, I aim to contribute to impactful projects in a forward-thinking organization. Dedicated to continuous learning and professional growth, I seek opportunities to leverage my technical expertise in developing enterprise-grade applications and leading system enhancements.

Career Summary

A results-driven software engineer with substantial experience in enterprise application development, specializing in HRM systems and custom modules. Successfully developed and deployed the **Meeting Matrix Module** for Reneta PLC, streamlining conference room reservations with single-line approver logic. Proven ability to manage and enhance critical modules, including Attendance, Leave, Training, and Survey, for over 27 high-profile clients, impacting 200,000+ users. Adept at collaborating with cross-functional teams, delivering high-quality code, and solving complex technical challenges with attention to detail. Seeking to contribute as a mid-level developer in dynamic environments.
